

LeeWay Venture

Fast and maneuverable vessel for in-shore and mid-shore support.

Venture is a lightweight, 7-metre patrol vessel designed for near shore survey and support work. With its composite hull and inboard Volvo Penta engine, Venture's top speed is 25 knots. The vessel can accommodate 3-4 people in addition to the Operator, for a variety of in-shore survey or patrol operations. Venture has a heated cuddy with single head.

The vessel's unique lightweight design means it can be transported aboard LeeWay Odyssey to provide additional support for larger jobs. This configuration extends Venture's endurance to that of Odyssey.

Venture is capable of enabling:

OCEAN TECH DEPLOYMENT & RECOVERY

Venture provides a perfect platform for the launch and recovery of ocean technology and instrumentation. The side davit and low bulwark provide ample room for deployments.

HYDROGRAPHIC SURVEYS

Port and starboard pole mounts can support the attachment of various side-mounted sonars. Venture's shallow draft and high maneuverability make it useful for in-shore and mid-shore survey work.

VESSEL SUPPORT

LeeWay Venture's size and maneuverability allow it to provide shore support for vessels that cannot get to port. The open back deck and forward storage compartment have ample room for transporting gear and supplies.

General Specifications

Registry: Halifax, Nova Scotia 🇨🇦

Built: Lakeside, Nova Scotia

Official Number: C02103NS

Length: 7.3 metres

Beam: 2 metres

GRT: 2.17 tonnes

Top Speed: 25 knots

Cruising Speed: 17 knots

Survey Speed: 6-10 knots

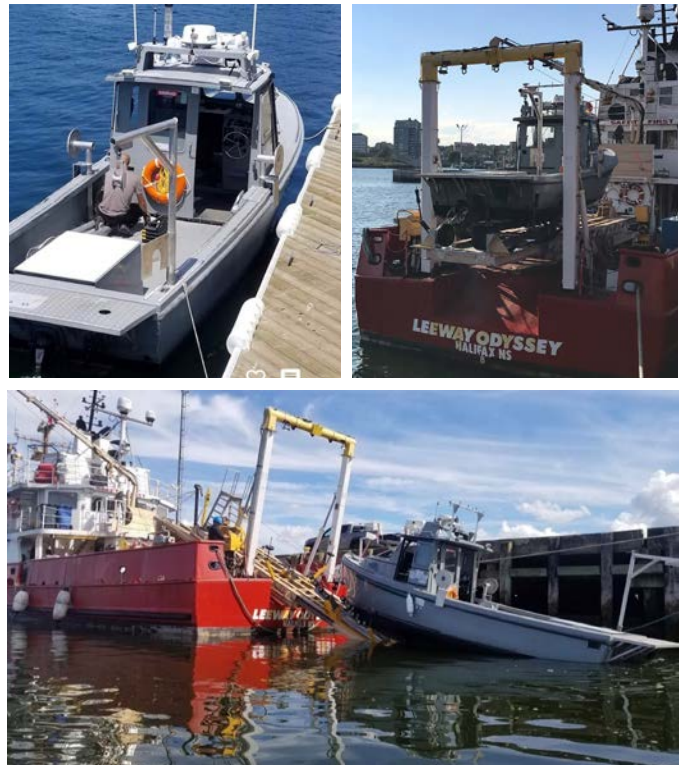

Constuction: Composite

Propulsion: Single prop

Crew: 2

POB w/o Crew: 3-4

Accomodations: Heated cud-
dy, head, bunk and storage
